### **HASP Online Launches JSABuilder Pro, an Online Subscription Service for Job Hazard Analysis**

AGOURA HILLS, CA--(Marketwire - October 14, 2008) - HASP Online, LLC is pleased to announce its new on-line subscription service, JSABuilder Pro ([www.JSABuilder.com](http://www.JSABuilder.com)) for conducting and managing JSAs (Job Safety Analysis, also known as JHA, or Job Hazard Analysis). JSABuilder Pro adds features and functionality to HASP Online's popular free JSABuilder service.

JSABuilder Pro is fast, easy-to-use, and comprehensive. Developed by health and safety professionals, JSABuilder Pro enables users to quickly navigate a series of screens, select information from pre-programmed lists, and enter text specific to the user's job or project. Once all information has been entered, users can download and print the JSA worksheet as an Adobe® PDF document for use in pre-job safety meetings, training sessions, or to store for future reference.

"I am very proud that we have created a tool to assist in the improvement of worker safety," said Jules Griggs, HASP Online co-founder and president of Safety Unlimited. "Not only does this remarkable tool simplify the organization of your JSAs, it helps you think through the process of conducting a JSA, placing an emphasis on Safety Analysis."

JSABuilder Pro is feature-rich and allows users to:

- Manage and store JSAs in their own online JSA library.
- View, edit, delete, and copy JSAs using a management console.
- Easily edit entries in the JSA Step Builder with advanced Step Builder editing.
- Create custom JSABuilder fields, making them automatically available for subsequent JSAs.
- Choose from a number of different JSA worksheet document formats.
- Upload their organization/company logo to print on their JSA document.
- Share JSAs with colleagues who are also JSABuilder Pro users.
- Download their JSA in Adobe® PDF, Microsoft® Word, or HTML file format. Or, view online in HTML format.

JSABuilder Pro is a service of HASP Online (<http://www.hasponline.com>), the first commercially available online health and safety plan development and management tool for HAZWOPER sites. For a limited time, HASP Online is offering the JSABuilder Pro service for \$99 (the first year), \$100 off the regular annual subscription price. Volume pricing is also available. More information on JSABuilder Pro is available at [www.JSABuilder.com](http://www.JSABuilder.com).

HASP Online, LLC is a joint venture between Safety Unlimited, Inc ([www.safetyunlimited.com](http://www.safetyunlimited.com)), an environmental, health and safety training provider, and EnviroSolve Corporation ([www.envirosolve.com](http://www.envirosolve.com)), an environmental engineering technology company.
